WHS DOCUMENTS & TEMPLATES

DOC-AGR-VOC · Angle Grinder VOC Assessment Template

Product Overview

For: Businesses whose workers use angle grinders for cutting, grinding and finishing: owners, supervisors, WHS advisers and workplace assessors

Version 1.0 · 9 November 2026

An editable verification of competency (VOC) for angle grinder users: check, and record, that a worker can do the work safely at your site.

Angle grinders cause deep cuts and face injuries when discs shatter or the grinder kicks back, start fires with sparks, and create silica dust when cutting masonry. Most injuries involve a removed guard, the wrong disc, or one-handed use. A verification of competency is how a business checks a worker uses the grinder safely at its site, and keeps a record of it.

This template gives the assessor everything in one place: the scope, the pre-assessment checks, knowledge questions with a separate marking guide, a practical observation checklist, the safety-critical fail criteria that stop an assessment, the evidence to keep, the outcome, sign-off and the review date.

No high risk work licence is needed for using an angle grinder under the WHS Regulations or, in Victoria, the OHS Regulations. The business must still make sure each worker is trained, competent and supervised for the work. Cutting or grinding outside a dedicated area may be hot work under your permit system, and cutting masonry, concrete or stone creates silica dust that needs its own controls. A VOC is the business's own check that a worker can do the work safely at its site: it is not a licence and it is not a nationally recognised qualification.

What is included

Item	File
VOC assessment tool: candidate and assessor details, scope, pre-assessment checks, practical observation checklist, safety-critical fail criteria, evidence, outcome, sign-off and review date	02_VOC_ASSESSMENT/Angle Grinder VOC Assessment Tool.docx and .pdf

Angle Grinder VOC Assessment Tool

Verification of competency for one worker, on the angle grinder and tasks in scope, at [Site name]

Purpose	To check, and record, that a worker can use safely on your plant, at your site, following your procedures.
When to use it	Before a new worker does the work unsupervised at the site; when they start on a new type of machine, attachment or task; at the re-verification interval your business sets; and after any of the review triggers in Part K.
Who completes it	An assessor your business has chosen as competent to assess (see Part B). The candidate completes the knowledge questions and signs Part J.
What goes with it	The Knowledge Questions (Candidate) for the candidate to answer, the Marking Guide (Assessor) with the model answers, and the VOC Register to track who is verified and when they are due.

Before you start

- Agree the scope (Part C) with the candidate's supervisor: what the candidate will do, on what, and where.
- Do the pre-assessment checks (Part D) before anything else. If one fails, do not start.
- The candidate answers the knowledge questions. Mark them with the Marking Guide and record the result in Part E.
- Observe the practical work (Part F) in the real work area, during normal work where it is safe, with other people kept clear.
- Watch for the safety-critical fail criteria (Part G) the whole time. Any one stops the assessment.
- Record the evidence, the outcome and the re-assessment plan (Parts H and I), give feedback, and sign off with the candidate (Part J).

Licences, training and the VOC

No high risk work licence is needed for using an angle grinder under the WHS Regulations or, in Victoria, the OHS Regulations. The business must still make sure each worker is trained, competent and supervised for the work. Cutting or grinding outside a dedicated area may be hot work under your permit system, and cutting masonry, concrete or stone creates silica dust that needs its own controls. A VOC is the business's own check that a worker can do the work safely at its site: it is not a licence and it is not a nationally recognised qualification.

Part A Candidate details

Name		**Position or role**	
Employer (if a contractor or labour hire)		**Employee or worker ID**	
Training or units of competency held (where required)		**Training completed (course and date)**	
Experience with this angle grinder		**Last VOC or training (date)**

Part B Assessor details

Name		**Position or role**	
Experience in this work (angle grinder)		**Licence or training held (where relevant)**	
Assessor training or experience		**Relationship to the candidate (for example, supervisor, peer, external)**	

The assessor should not assess work they are not competent to do themselves. Where the assessor is the candidate's direct supervisor, record it above. It is allowed, but an independent assessor is preferred where practicable.

Part C Scope of this VOC

This VOC covers only the grinder sizes, discs and tasks ticked and written here.

Grinder (tick each one assessed)	Discs and tasks (tick each one in scope)
☐ Small angle grinder (100 to 125 mm) ☐ Large angle grinder (180 to 230 mm) ☐ Battery angle grinder ☐ Other: _____	☐ Cutting disc (metal) ☐ Grinding disc ☐ Flap or finishing disc ☐ Wire brush ☐ Diamond blade for masonry, concrete or stone (silica controls) ☐ Other: _____

Grinder make and model		**Equipment ID**	
Rated speed of the grinder (from the plate)		**Disc types and sizes used**	
Site		**Work areas**	
Materials cut or ground		**People and combustibles nearby**

Angle Grinder VOC Knowledge Questions (Candidate)

Answer in your own words. You may answer out loud and have the assessor write it down.

Name		Date	
Equipment		Site	

For the candidate

These questions check that you know how to do this work safely at this site. Answer every one in your own words. Short answers are fine. If you have trouble reading or writing, tell the assessor: they will read the questions to you and write down your answers.

1. Why must the guard stay on, and how is it set? ★ critical

The rest of this page, and the rest of this document, are in the full product.
