WHS DOCUMENTS & TEMPLATES

DOC-AUD-STV · Stevedoring Code of Practice Audit Tool

Product Overview

For: Stevedoring companies, port and terminal operators, labour hire providers and WHS advisers in the harmonised WHS jurisdictions who check how stevedoring risks are managed

Version 1.0 · 15 November 2026

SAMPLE

An audit tool for the code of practice Managing risks in stevedoring: 31 audit questions, chapter by chapter, each with the code reference and the evidence to look for, scored automatically in Excel, with a dashboard, a corrective action register, a field checklist and a report template.

The stevedoring code of practice explains how to manage the risks of loading and unloading ships' cargo, stacking and storing it on the wharf, and receiving and delivering it at a terminal: planning and emergency plans, vessel and plant inspections, gangways, lighting, traffic, falls, noise and fatigue, suspended loads, lashing, work in holds, cargo types, and cranes and lifting equipment. This tool turns what the code expects into 31 plain-English audit questions, in the code's own chapter order, each with its chapter and section number and the documents, observations and interviews that would show it is in place.

Rate each question Compliant, Partly, Not compliant or N/A. The workbook scores each chapter and the whole audit automatically, leaving out anything not applicable, draws a dashboard, and gathers every gap into a corrective action register. The field checklist carries the same questions on paper, and the report template turns the results into a short report with sign-off.

It is written once for the harmonised WHS jurisdictions and audits Western Australia's edition of May 2022. A short table shows which edition applies in each of NSW, Queensland, Western Australia, South Australia, Tasmania, the ACT, the Northern Territory and Comcare. Victoria has its own compliance codes. Made by Orana Skills Centre.

How to Use This Audit Tool

Stevedoring Code of Practice Audit Tool

What this tool audits

The stevedoring code of practice explains how to manage the risks of loading and unloading ships' cargo, stacking and storing it on the wharf, and receiving and delivering it at a terminal: planning and emergency plans, vessel and plant inspections, gangways, lighting, traffic, falls, noise and fatigue, suspended loads, lashing, work in holds, cargo types, and cranes and lifting equipment. This tool audits Western Australia's approved Code of practice: Managing risks in stevedoring (May 2022), the newest edition read for this tool whose licence allows commercial use. It follows the national model code; the questions keep to what all jurisdictions share, and the jurisdiction differences show what Western Australia added and the edition that applies elsewhere.

The tool has 31 audit questions in 7 chapters. Each gives the chapter and section it comes from, so you can read the code itself, and the evidence that would show it is in place.

File	What it is for
Audit Workbook (Excel)	The main tool: audit details, the checklist with ratings and actions, the dashboard of scores, and the corrective action register
Field Audit Checklist (Word, PDF)	The same questions on paper, for the walk-through
Audit Report Template (Word, PDF)	The report to the people who must act on the findings

When to use it

- On a schedule: at least once a year where the code's hazards are present, and more often where the risks are high or the work changes often
- Before an external audit, an inspection or a tender that asks how you manage these risks
- After an incident, a near miss or a complaint that points to a gap
- After a change: new work, plant, premises, people or contractors
- To check that the actions from the last audit were done and are working

Who should audit

- Someone who knows the code and the work, and has the time to do it properly
- Someone who is not auditing their own work. In a small business, a manager from another area or an outside adviser can do it
- With the people who do the work: involve health and safety representatives, and talk to workers on every shift audited
- With the authority to see the records and the workplace, and to report to someone who can act

How to rate

Rating	Use it when
Compliant	What the code expects is in place, it is working, and you saw evidence of it: a record, the thing itself, or consistent answers from the people doing the work.
Partly	Some of it is in place, or it is in place but not working well, not followed everywhere, or not evidenced. Raise an action.

Field Audit Checklist

Stevedoring Code of Practice Audit Tool

Site		Auditor	
Date		Scope	

How to use it

- Take this checklist on the walk-through. Look for the evidence, tick a rating and note what you saw. Then enter the results in the Audit Workbook, which scores them.
- C: Compliant (in place, working, evidenced). P: Partly. NC: Not compliant. N/A: does not apply here (say why). Raise an action for every P and NC.
- Ref is the chapter and section of the code of practice Managing risks in stevedoring (Western Australia's edition of May 2022).

No.	Ref	Audit question	Evidence to look for	Rating	Notes
1 Duties, consultation and training					
1	1.2	Does the business manage the risks of its stevedoring operations, and do officers make sure it has processes to do so?	Document: The stevedoring risk register and procedures, reports to officers. Ask: An officer.	☐ C ☐ P ☐ NC ☐ N/A	
2	1.2	Do the businesses involved, such as the stevedore, the terminal or port operator, labour hire providers, contractors and the ship's master, consult, cooperate and coordinate on shared risks?	Document: Coordination meeting records, interface agreements. Ask: The terminal manager.	☐ C ☐ P ☐ NC ☐ N/A	
3	1.3	Are workers consulted on hazards and controls, through their health and safety representatives where they are represented, for example in toolbox talks with records kept?	Document: Consultation and toolbox talk records. Ask: Workers, health and safety representatives.	☐ C ☐ P ☐ NC ☐ N/A	
4	1.4	Are all workers, including contractors, given information, training and instruction on the hazards of the work they are about to do and the controls, with a training plan made in consultation with workers?	Document: Induction and training records, the training plan. Ask: Workers, contractors.	☐ C ☐ P ☐ NC ☐ N/A	
2 Risk management					
5	2.1	Have the hazards of the stevedoring operations been identified, such as mobile plant and traffic, suspended loads, falls, lashing, work in holds and the cargo itself?	Document: Hazard identification records. Observe: The wharf and the vessel.	☐ C ☐ P ☐ NC ☐ N/A	
6	2.2	Are the risks assessed, deciding what further action is needed and how urgently?	Document: Risk assessments.	☐ C ☐ P ☐ NC ☐ N/A	
7	2.3	Are the risks controlled using the hierarchy of control, aiming first to eliminate the hazard, with administrative controls and PPE only for the risk that remains?	Document: The controls chosen. Observe: Controls in place.	☐ C ☐ P ☐ NC ☐ N/A
