WHS DOCUMENTS & TEMPLATES

DOC-EWP-FV · Elevating Work Platform Field Verification Checklist

Product Overview

For: Businesses that use boom-type and scissor elevating work platforms: owners, supervisors, WHS advisers and workplace assessors

Version 1.0 · 9 November 2026

An editable supervisor's checklist that checks, on site, that the controls for elevating work platform are in place and working.

The supervisor looks at each control working, not at its paperwork, and marks each check Pass, Not met or N/A, with the evidence seen. ★ marks the critical controls, and a critical control that is Not met is escalated the same shift. The checklist also has questions for the people doing the work, an actions table with owners and due dates, a summary and sign-off.

It is the same checklist as in the Elevating Work Platform Safety & Competency Pack (DOC-EWP-PACK), word for word. The Elevating Work Platform VOC Assessment Template (DOC-EWP-VOC) and the Elevating Work Platform Safe Work Instruction Template (DOC-EWP-SWI) are also sold on their own. The Elevating Work Platform Safety & Competency Pack (DOC-EWP-PACK) contains them all: the safe work instruction, the EWP pre-start checklist, the VOC and the field verification, with a setup guide.

A document is not a control. The barrier, the exclusion zone, the lock and the competent worker are the controls. These documents describe them, check them, and record that they are working. A control must change the risk, and someone must be able to check it.

These documents support your business to manage risk and meet its WHS or OHS duties. They do not do that on their own. They are general templates: adapt them to your equipment, your site and your people, consult your workers, and check that the controls they describe are in place and working.

What is included

Item	File
Supervisor field verification checklist: ground, exclusion zones, harnesses, overhead hazards, powerlines and rescue, with Pass, Not met, actions, escalation and evidence	02_FIELD_VERIFICATION/Supervisor Field Verification Checklist.docx and .pdf
Setup note: what to adapt before use, and every placeholder	01_START_HERE/Setup Note.pdf
Start here: Read Me First, Product Overview, Permitted Use Terms, Version Information	01_START_HERE/ (four PDFs)

Who it is for

- Businesses that use boom-type and scissor elevating work platforms
- Supervisors and managers who check that controls are working, on a set schedule and after a change or incident

Supervisor Field Verification Checklist

Elevating work platforms: ground, exclusion zones, harnesses, overhead hazards, powerlines and rescue

Site		**Areas checked**	
Date and time		**Shift**	
Verified by		**EWPs checked (plant IDs)**	

How to verify

- Visit the area while EWP work is under way. Look at each control working, not at its paperwork.
- Mark each check Pass, Not met or N/A. Pass means you saw the control in place and working. If you did not see it, it is not a Pass.
- Write what you saw in the evidence column: a location, a photo reference, a record you sampled.
- Talk to the people doing the work, using the questions after the checks. They know where the near misses are.
- Record every Not met in the actions table, with an owner and a due date. Fix what you can on the spot, and record that too.

Escalate now

If a ★ critical control is Not met, act before you leave the area. Stop or restrict the EWP work there until it is fixed or another control is in place, and tell **[Escalation contact]** the same shift. A failed critical control is a high potential incident: report it as one.

Checks

★ marks a critical control: one whose failure could let a person fall, be crushed, be electrocuted or be struck by a falling object. Delete checks that do not apply, and add your own.

No.	Look for (★ critical control)	Pass	Not met	N/A	What you saw (evidence)
Set-up and ground					
1	EWPs are on firm, level ground within the manufacturer's limits; outriggers on pads where fitted ★	☐	☐	☐	
2	Ground hazards (pits, covers, edges, soft ground) are identified and barricaded ★	☐	☐	☐	
Exclusion zones and falling objects					
3	An exclusion zone is barricaded below and around each EWP ★	☐	☐	☐	
4	Tools are tethered and materials secured inside the platform	☐	☐	☐	
People in the platform					
5	Operators in boom-type EWPs have their harness attached to the anchor point ★	☐	☐	☐
